CONTENTS

Preface ix

Welcome address xxi

Keynote talks

Perspectives in nuclear physics
C. Détraz 3c

In search of quark matter – The new round of tests
M. Jacob 13c

Hadrons and nuclei far away from equilibrium
U. Mosel 29c

Impact and applications of nuclear science: opportunities and perspectives
A. van der Woude 51c

Collective dynamics

Multiphonon excitations in nuclei built on giant resonances: status and trends
N. Frascaria 63c

Probing reaction dynamics with GDR decay
J.R. Beene 73c

The GDR at finite temperature in medium and very heavy mass regions
A. Bracco et al. 83c

Regular and chaotic dynamics in giant nuclear oscillations
W. Bauer et al. 93c

On the giant dipole resonance excitations in very hot nuclei
P.F. Bortignon et al. 101c

The giant dipole resonance at very high temperatures
T. Suomijärvi et al. 105c

Spin-flip and non-spin-flip isovector excitations observed in the (^{12}C, ^{12}N) reactions at E / A = 135 MeV and the (^{13}C, ^{13}N) reactions at E / A = 100 MeV
T. Ichihara et al. 109c

A search for the isovector monopole resonance in ^{208}Pb
I. Lhenry et al. 115c

Pre-equilibrium dipole strength excitation in dissipative heavy-ion collisions
L. Campajola et al. 119c

High energy γ-rays measured in coincidence with α-particles in the reaction $^{19}F + ^{12}C$ at $E_{lab} = 121.7$ MeV
J.P.S. van Schagen et al. 123c

Fusion–fission dynamics

Mean angular momenta in heavy ion fusion
D. Ackermann et al. 129c

Fusion barrier distributions and fission anisotropies
D.J. Hinde et al. 135c

Time scales of fusion–fission reactions calculated from prescission neutron multiplicities
K. Siwek-Wilczyńska et al. 141c

GDR emission and first chance fission probability in ^{200}Pb
D. Fabris et al. 145c

Study of pre-scission evaporation for $^{84}Kr + ^{27}Al$ at 10.6 MeV / u using 3π-phoswich detector system
T. Nakagawa et al. 149c

Long fission time of highly excited radium compound nuclei ending in the formation of evaporation residues
A.N. Andreyev et al. 153c

Crystal blocking: experimental evidence of long delay times in the reaction induced on nickel by oxygen ions
A. D'Arrigo et al. 157c

Origin and decay-properties of binary fragments produced in the $^{35}Cl + ^{24}Mg$ reaction at $E/A \approx 8$ MeV / A
Sl. Cavallaro et al. 161c

Model of competition between complete fusion and quasi-fission in reactions with massive nuclei
E.A. Cherepanov et al. 165c

Formation cross section of neutron deficient polonium isotopes in asymmetric and symmetrical heavy ion fusion
A.N. Andreyev et al. 169c

The 4-fold fission in $^{40}Ar + ^{209}Bi$, ^{197}Au and ^{159}Tb at 25 MeV / u
G.X. Dai et al. 173c

Formation and decay of highly deformed nuclei

Highly deformed nuclear shapes: recent results from experiment and theory
M.P. Carpenter and R.V.F. Janssens 183c

Decay of superdeformed structures studied with GASP
D. Bazzacco 191c

New insights into superdeformed nuclei with EUROGAM
P.J. Twin 199c

Pseudo-spin flip in doubly decoupled structures and identical bands
A.J. Kreiner et al. 209c

Proton spectra in coincidence with super- and hyper-deformed bands in ^{152}Dy
M. Lunardon et al. 215c

Search for positive parity bands in ^{117}Xe
Z. Liu et al. 221c

Collective high spin states in ^{45}Sc
P. Bednarczyk et al. 227c

Towards ^{100}Sn with GASP + Si-ball + Recoil Mass Spectrometer: High-spin states of ^{105}Sn and ^{103}In
G. de Angelis et al. 231c

Resonant structures

Experiments on e^+e^--line emission in HI collisions
R. Bär et al. 237c

Positron production in heavy ion collisions: current status of the problem
I. Ahmad et al. 247c

The $C(Q_0?)$ scenario: bound sharp positron decay, its resonant inverse, and sharp lines from $[\beta^+ + atom]$
J.J. Griffin 257c

The high precision measurement of $^{208}Pb + ^{208}Pb$ Mott scattering at energies under the Coulomb barrier: the observation of new atomic effects
A. Lépine-Szily et al. 263c

Dynamics of the di-nucleus binary decay: role of the number of open channels
C. Beck et al. 269c

Nonlocal time-space coherent structures in dissipative heavy-ion collisions from the analysis of excitation function fluctuations
S. Yu. Kun 275c

Angular distribution of the $^{12}C(^{12}C, ^{8}Be_{gs})^{16}O_{gs}$ reaction around the 32.5 MeV resonance
M. Aliotta et al. 281c

Investigation of the α-particle linear chain configuration in ^{24}Mg at 46.4 MeV excitation
E.T. Mirgule et al. 287c

Potential resonance affected by non-adiabatic transition in nuclear heavy-ion collisions
T. Tazawa, N. Takigawa and Y. Abe 291c

Medium to high energy collisions: theoretical developments

Molecular dynamics model of heavy ion collisions at medium energies
H. Horiuchi 297c

Fluctuations and instabilities in multifragmentation
Ph. Chomaz, M. Colonna, A. Guarnera and B. Jacquot 305c

Directed flow from LBL to AGS energy
G. Peilert 317c

Dynamics of fluctuations in heavy-ion reactions
B. Remaud et al. 323c

Simplified treatment of collective instabilities in matter
J. Randrup 329c

Quantum effects in many-body transport theory
A. Smerzi, V.N. Kondratyev and A. Bonasera 333c

Quantum effects for collision term in transport equation
H.S. Köhler 339c

Beyond linear response theory in multifragmentation
M. Baldo, G.F. Burgio and A. Rapisarda 343c

Fermionic molecular dynamics: ensembles and fluctuations therein
H. Feldmeier and J. Schnack 347c

Thermalization effects in heavy-ion collisions
D.T. Khoa, A. Faessler, N. Ohtsuka and D.H.E. Gross 353c

On the impossibility of temperature extraction from heavy ion induced particle spectra
J. Konopka, H. Stöcker and W. Greiner 357c

Medium to high energy collisions: particle production and reaction mechanisms

Probing the nucleus–nucleus collisions at the pre-equilibrium stage
A. Del. Zoppo et al. 363c

Hard photon as a probe to study dissipation mechanisms
J.H.G. van Pol et al. 373c

Kaon production in nucleus–nucleus collisions at 92 MeV per nucleon
F.R. Lecolley et al. 379c

A systematic study of neutral pion squeeze-out at intermediate energies
A. Schubert et al. 385c

The investigation of very fast light particles emission and subthreshold pion production in heavy ion collisions at low and intermediate energies
K.O. Oganesyan et al. 389c

Influence of the emitting nucleus on the light-particle correlation function
B. Erazmus et al. 395c

Interferometry measurements selected by neutron calorimetry
A. Ghisalberti et al. 401c

Two-proton correlation function measured at very small relative momenta
L. Martin et al. 407c

Heavy ion physics at the Cyclotron Centre, Calcutta
B. Sinha 413c

Observation of the one- to six-neutron transfer reactions at sub-barrier energies
E.K. Rehm et al. 421c

Statistical and sequential breakup of ^{24}Mg in peripheral reactions at intermediate energies
M. Samri et al. 427c

Single particle states in the continuum
A. Bonaccorso 433c

Nuclear-rainbow effect by transfer reactions
P. D'Agostino et al. 437c

Production of heavy fragments in the reaction $^{40}Ar + ^{232}Th$
E.C. Pollacco et al. 441c

Angular momentum transfer in peripheral collisions at GANIL
J. Colin et al. 449c

Dissipative aspects in projectile fragmentation at 200 MeV / u
L. Tassan-Got et al. 453c

Performance of the Huygens detector at intermediate energies
R.J.M. Snellings et al. 457c

Chimera: a project of a 4π detector for heavy ion reactions studies at intermediate energy
S. Aiello et al. 461c

First experiments with FOBOS
A.A. Aleksandrov et al. 465c

Medium to high energy collisions: fragmentation and flow

Fragmentation in exclusive measurements
W.G. Lynch 471c

Study of the nuclear multifragmentation: recent results obtained with the INDRA detector in the intermediate energy domain
F. Saint-Laurent et al. 481c

Flow and multifragmentation in nuclear collisions at intermediate energies
H.G. Ritter et al. 491c

Central Au on Au collisions
A. Gobbi 499c

Time scale and branching ratios in sequential multifragmentation
L.G. Moretto et al. 513c

Dynamical production of intermediate-mass fragments in peripheral $^{209}Bi + ^{136}Xe$ collisions at $E_{lab}/A = 28$ MeV
J. Tõke et al. 519c

Neck instabilities in deep inelastic collisions at medium energies
M. Colonna et al. 525c

Multifragment emission times in Xe induced reactions
A. Moroni et al. 531c

Blast expansion in $^{32}S + ^{27}Al$ at 37.5 MeV/nucleon
D. Heuer et al. 537c

Azimuthal dependence of the directed flow in collisions up to 95 MeV/u: From in-plane to out-of-plane enhancement
J.C. Angelique et al. 543c

Transverse flow and π^0 production from the BNV transport equation with a microscopic EOS
A. Insolia, U. Lombardo, G. Russo and N.G. Sandulescu 547c

Multifragmentation and flow: peripheral vs. central collisions
J. Pochodzalla et al. 553c

Light particle ($Z \leqslant 2$) emitted in "central" Au + Au collisions at 250 A MeV beam energy
G. Pasquali et al. 561c

Prominent transverse flow of clusters in stopped Au(150 A MeV) + Au reactions
J.P. Coffin et al. 567c

Mass dependence in the flow of light fragments emitted from the anisotropically expanding collision zone
A. Kugler and R. Pleskač 571c

Intermediate mass fragment production on Au, Ag, Ni and Al targets induced by 1 GeV protons
A.A. Kotov et al. 575c

Energy spectra and angular distribution of intermediate mass fragments emitted in Au / Au(p, X) reactions with $E_p = 12$ GeV (The first result of the KEK - 12 GeV - PS experiment; E288)
K.H. Tanaka et al. 581c

Multifragmentation induced by relativistic α-projectiles
V. Lips et al. 585c

Hot and dense nuclear matter

Hadrons in dense matter
C.M. Ko and G.Q. Li 591c

Microscopic theory of the nuclear equation of state
M. Baldo et al. 599c

Neutral meson production in relativistic heavy ion collisions
W. Kühn 607c

Dilepton production from p–p to Ca–Ca at the Bevalac
H.S. Matis et al. 617c

Newborn hot neutron stars
I. Bombaci et al. 623c

Plans for investigation of subthreshold K^+ production in $p + A$ collisions
O.W.B. Schult et al. 629c

Subthreshold antiproton productions in pA, dA and αA reactions
J. Chiba et al. 633c

An experimental run on the new superconducting accelerator Nuclotron at 3.8 and 6.2 GeV / c deuteron momentum
A.M. Baldin et al. 637c

Ultrarelativistic heavy ion collisions

Vector meson production in ultra-relativistic heavy ion collisions at CERN
C. Gerschel 643c

Probing the extremes of high baryon density nuclear matter: the BNL AGS program
G.S.F. Stephans 653c

What is the structure of the quark–gluon plasma near the critical temperature?
D.H. Rischke 663c

Heavy ion physics at the future colliders RHIC and LHC
J. Schukraft 673c

Special round table session: "Is there room for cross-fertilization between low and high energy heavy ion physics?"
P. Sonderegger 683c

Strange particle production in nuclear collisions
P. Foka et al. 687c

Dilepton rapidity distributions from a hadronizing quark–gluon plasma
R. Vogt, B.V. Jacak, P.L. McGaughey and P.V. Ruuskanen 693c

The lead ion accelerating facility and the relative experimental program at CERN SPS fixed target
L. Riccati 699c

Classical hadrodynamics: a new approach to ultrarelativistic heavy-ion collisions
B.W. Bush and J.R. Nix 705c

Hadronic matter probed with strangeness in nucleus–nucleus collisions at JINR
E. Okonov 711c

Physics with radioactive beams

Reaction rates of astrophysical interest obtained with radioactive beams
J. Vervier 717c

Nuclear structure studies using radioactive beams
B.M. Sherrill 725c

Halo nuclei and other exotics
B. Jonson 733c

Extremely neutron-rich nuclei and electro-magnetic excitations
M. Ishihara 747c

Perspectives on study of unstable nuclei near drip lines
H. Sagawa 755c

Beta-decay studies of far from stability nuclei near $N = 28$
O. Sorlin et al. 763c

Are all nuclei spherical at the drip line?
I. Tanihata, D. Hirata and H. Toki 769c

Study of light neutron-rich nuclei with ^{14}C-induced reactions
H.G. Bohlen et al. 775c

Measurement of the $^{13}N + ^{12,13}C$ elastic scatterings
E. Liénard et al. 783c

Elastic scattering, inelastic scattering and charge exchange reaction studies with ^{6}He, $^{10,11}Be$ secondary beams
M.D. Cortina-Gil et al. 787c

Investigation of the elastic scattering and fission reactions induced by ^{6}He beam
Yu.E. Penionzhkevich et al. 791c

Dissociation of $^{8}He + n + X$ at 240 MeV / u
T. Nilsson et al. 795c

Study of the nucleon density distribution of ^{6}He and ^{8}He by proton elastic scattering in inverse kinematics
S. Neumaier et al. 799c

Particle momentum distributions for ^{8}He in $\alpha + 4n$ model
M.V. Zhukov, A.A. Korsheninnikov, M.H. Smedberg and T. Kobayashi 803c

Interaction cross-sections and radii of ^{11}C and ^{12}N and effective deformation parameters in light mirror nuclei
A. Ozawa et al. 807c

Sub-Coulomb fusion with halo nuclei
V. Fekou-Youmbi et al. 811c

Dynamic polarization potential induced by dipole Coulomb excitation to break-up states in ^{11}Li scattering
M.V. Andrés, J. Gómez-Camacho and M.A. Nagarajan 817c

Synthesis of new elements

Synthesis and properties of superheavy nuclei
Yu. Ts. Oganessian 823c

Synthesis and study of neutron rich nuclides
Y.X. Luo 837c

Approaching ^{100}Sn in decay studies
E. Roeckl 849c

Identification of ^{100}Sn
R. Schneider et al. 853c

Observation of ^{100}Sn
M. Lewitowicz et al. 857c

Evidence for the synthesis of $^{267}110$ produced by the $^{59}Co + ^{209}Bi$ reaction
A. Ghiorso et al. 861c

Production of ^{114}Ba in $^{58}Ni + ^{58}Ni$ reactions and detection of its cluster radioactivity
A. Guglielmetti et al. 867c

Closing remarks
H. Feshbach 871c

List of participants 875c

Author index 889c
